

Eyelets

from the electronic eyelet specialists

Anyone making,

Modifying, or repairing

PC Boards will appreciate

The flexibility and versatility of electronic eyelets.

They're simple to use, low in price, strong in application, and offer several advantages over through-hole plating.

Since 1973, International Eyelets has specialized in only one product line—electronic eyelets and the tools necessary to place them most effectively and efficiently. Our commitment to the development of the electronic eyelets and to the needs of our customers maintains International Eyelets as the premier source for eyelets and Eyelet-setting tools.

When ordering, please specify the type of plating

Desired. Tin, solder, nickel, or gold plating

to MIL specifications is available. Eyelet material is indicated by the final letter of the part number- **"B"** = **brass**, **"C"**= **COPPER**.
